Synthetic manual for learning

Classic White T-Shirt User Manual

How to Use

Wear for casual everyday use or layering. Machine wash cold with similar colors inside out. Use gentle detergent and avoid bleach to maintain fabric brightness and softness. Tumble dry low or hang dry in the shade to preserve fit and prevent fabric shrinkage. Iron inside out on medium heat if necessary.

Troubleshooting

If yellowing occurs, pre-soak in cold water with baking soda before washing. For persistent coffee or grease stains, apply mild liquid detergent directly onto the spot and let sit for ten minutes before regular laundering. If minor shrinking happens, gently stretch the damp shirt back to shape before flat drying.

Warranty

Comes with a 30-day satisfaction guarantee covering fabric defects, torn seams, and stitching flaws. Normal cosmetic wear, accidental snags, or shrinkage caused by high-heat washing and drying are excluded. Contact support with your order ID for replacement or refund requests.
